# Downloading Comlabgames

I. Comlabgames software requires JAVA installation. If you need to install it, go to:

a. For Windows go to: JDK21-windows and install "x64 Installer" (*jdk-21_windows-x64_bin.exe*).

b. For macOS go to: JDK21-mac and install one of the "DMG Installers" (depending on your processor).

II. To save the Comlabgames module on your desktop:

1. Open a browser, and go to the Comlabgames website.

2. Save the "Standalone version" on your desktop.

3. The Comlabgames app on your desktop should look:

Checking the Comlabgames Software

1. Double Click on ComLabGames app 🖼️ to start the software.
2. Allow access when prompted on "Windows security alert display".
3. The Design window is displayed by default.
4. If you see the design display you are ready to:
   - ❑ play games as an experimental subject.
   - ❑ design games to conduct your own experiments.
   - ❑ analyze the resulting experimental outcomes.

Windows Security Alert

Windows Defender Firewall has blocked some features of this app

Windows Defender Firewall has blocked some features of Java(TM) Platform SE binary on all public and private networks.

Name: Java(TM) Platform SE binary
Publisher: Oracle Corporation
Path: C:\program files\java\jre1.8.0_341\bin\javaw.exe

Allow Java(TM) Platform SE binary to communicate on these networks:
☑ Private networks, such as my home or work network

☐ Public networks, such as those in airports and coffee shops (not recommended because these networks often have little or no security)

What are the risks of allowing an app through a firewall?
